Verbal Description

A canine tooth, probably from a dog, given the size, pierced near the top. The tooth is now split from ~~top~~ to bottom, side to side. It is in poor condition: the enamel from the buccal half has come off, half in [during] deposition, half as I examined it; the enamel on the lingual half is cracked longitudinally, and the upper margin is chipped; finally, the root end is broken, with about 1/3 of the pierced hole missing. The hole is 0.2 cm in diameter ^{on one side}, 0.3 cm on ^{the other}. I see no signs of use or wear. Not drawn.
